

I'm a software engineer who specializes in developing front-end software development. Through several projects that I've been involved in, I'm quite familiar with some of the front-end development tools and basics which includes ReactJS, Material UI, Redux, and TailwindCSS.

Technologies and Languages

- Languages: HTML, CSS, JavaScript, Python
- Technologies: Git, React, MUI, TailwindCSS, Redux, Styled Components

Projects

- **Portfolio**- A responsive personal development portfolio where I showcase my projects. See the source on [Github](#).
- **Movie21** - A comprehensive movie application where users can discover titles within specific categories and genres, save them to watchlists, view trailers for upcoming films, and access information about the cast, synopsis, and more. See the source on [Github](#).
- **Ecommerce** - This e-commerce application will include the ability to add and edit products on the go using a Sanity, all advanced cart, and checkout functionalities, and most importantly, the complete integration with Stripe so that you can cover real payments. See the source on [Github](#).
- **Gold Gym** - Gold Gym has the functionality to choose exercise categories and specific muscle groups, browse more than one thousand exercises with practical examples, pagination, exercise details, pull related videos from youtube, display similar exercises, and much more. See the source on [Github](#).
- **Admin Dashboard** - An awesome dashboard application where you can use a fully functional calendar, a kanban board, color picker, and WYSIWYG editor, as well as seven different chart. This Admin Panel includes one Dashboard, Three Pages, Four Apps, and Seven fully functional charts. See the source on [Github](#).

Education and Certifications

- **AS Computer Science**, Columbia College, Canada 2020–2022

Other Sections

- **Scrum Fundamentals Certified (SFC) - (2022)**
- **Personal Website** - [sooneric](#)

Interests

- I like to read Japanese comic books (manga) and I am a food lover, especially seafood.
